Remote Sensing of Environment

An Interdisciplinary Journal

VOLUME 37, 1991

Contents

In Memoriam: David S. Simonett, 1926–1990 iv

J. F. de Haan, J. W. Hovenier, J. M. M. Kokke, and H. T. C. van Stokkom
Removal of Atmospheric Influences on Satellite-Borne Imagery: A Radiative Transfer Approach 1

Bent Lorenzen and Arne Jensen
Spectral Properties of a Barley Canopy in Relation to the Spectral Properties of Single Leaves and the Soil 23

Russell G. Congalton
A Review of Assessing the Accuracy of Classifications of Remotely Sensed Data 35

Xiaoping Yuan, Doug King, and Jerry Vlcek
Sugar Maple Decline Assessment Based on Spectral and Textural Analysis of Multispectral Aerial Videography 47

Giuseppe Zibordi and Gian Paolo Meloni
Correction of Bihemispherical Reflectance Measurements for Noncosine Response of 2π Steradian Optics: A Methodology and Its Application to Antarctic Surfaces 55

Diane L. Evans and Milton O. Smith
Separation of Vegetation and Rock Signatures in Thematic Mapper and Polarimetric SAR Images 63

Announcement 76

J. L. Foster and D. K. Hall
Observations of Snow and Ice Features During the Polar Winter Using Moonlight as a Source of Illumination 77

G. M. Ferrari
Influence of pH and Heavy Metals in the Determination of Yellow Substance in Estuarine Areas 89

S. Khattak, R. A. Vaughan, and A. P. Cracknell
Sunglint and Its Observation in AVHRR Data 101

A. Rosema, W. Verhoef, J. Schroote, and J. F. H. Snel
Simulating Fluorescence Light-Canopy Interaction in Support of Laser-Induced Fluorescence Measurements 117

Tiit Nilson and Urmas Peterson
A Forest Canopy Reflectance Model and Test Case 131

Andres Kuusk
The Angular Distribution of Reflectance and Vegetation Indices in Barley and Clover Canopies 143

Editorial Note iv

Elizabeth C. I. Paisley, Nicholas Lancaster, Lisa R. Gaddis, and Ronald Greeley
Discrimination of Active and Inactive Sand from Remote Sensing: Kelso Dunes, Mojave Desert, California 153

Tibor Tóth, Ferenc Csillag, Larry L. Biehl, and Erika Michéli
Characterization of Semivegetated Salt-Affected Soils by Means of Field Remote Sensing 167

A. U. Bhatti, D. J. Mulla, and B. E. Frazier
Estimation of Soil Properties and Wheat Yields on Complex Eroded Hills Using Geostatistics and Thematic Mapper Images 181

B. A. M. Bouman
Crop Parameter Estimation from Ground-Based X-Band (3-cm Wave) Radar Backscattering Data 193

Contents continued

Andres Kussk
Determination of Vegetation Canopy Parameters from Optical Measurements 207

Short Communication

Ranga B. Myneni and G. Asrar
Photon Interaction Cross Section for Aggregations of Finite-Dimensional Leaves 219

Volume Contents
